

Stages SC1 Indoor Cycling bikes

- Power meters on the consoles! One more tool to increase fitness and get more efficiency out of your ride.
- Carbon Blue technology belts. Most belts will wear and stretch with time, making the Watt reading inaccurate. Not the Carbon Blue Belts. Get a consistent feel and power reading no matter what bike you are on!
- Water Bottle Holders. The placement of these holders are functional and will accommodate left and right handed riders as well as any size water bottle.
- The frame is lighter AND more stable. Our taller, more powerful riders will really feel a difference!
- Safer pin placed seat adjustments with more options for your perfect fit.
- And the list goes on.
- Please note: it has been recommended by our bike manufactures, as well as every manufacturer we consulted with that the seats should remain level. They are currently set in a level and more ergonomically correct position.

Stages Cycling is dedicated to improving your cycling performance, fitness, and health. Stages offers all athletes the precision data demanded by cycling's elite, in an easy to understand form to help anyone achieve their greatest goal—indoors or out.
